

GENERAL

Soundcraft FaderGlow™ (Pat. Pend.) is a unique feature that gives the user an additional level of status indication, and can significantly reduce operating errors.

On the console, several different functions can be assigned to a particular fader, it can therefore be easy to forget which function is currently being controlled, especially when grabbing a fader in a hurry. The main principle of the Soundcraft FaderGlow is therefore to indicate the actual function type that is currently assigned to a particular fader.

Soundcraft FaderGlow is fitted to all Faders that can change their function.
